

## Michigan Department of Community Health

### Approved Training Curricula

The following curricula are approved with the qualification that they remain consistent with Michigan Law and Rules. Community Mental Health Service Programs (CMHSP's) continue to be responsible for assuring direct care staff are able to fully implement each recipient's written plan of services. CMHSP's have the responsibility and authority to select and use an approved curriculum that *best* meets the needs of the individuals they serve, or are responsible for serving, and assure that the curriculum is implemented in a thorough and complete manner. CMHSP's also remain responsible for the compliance of the specialized residential providers with whom they contract. It remains the discretion of the CMHSP to decide on what approved curricula are used and who provides the training for the specialized residential homes they operate or contract with.
